ACCESSING THE RENT MANAGER SANDBOX

PLATFORM OPTIONS FOR RENT MANAGER

Rent Manager customers can access their data using two different cloud-based solutions—**Rent Manager Express** and **Rent Manager 12**. Both platforms provide access to the same data.

WATCH VIDEO
TO LEARN MORE

Rent Manager Express

- Accessed via a web browser

Rent Manager 12

- Access via a Remote Desktop Connection

RENT MANAGER DEMO DATABASE

- The demo database is a fully functional Rent Manager environment that is used to test your integration, among other tasks. It is pre-populated with data that mimics how an end-user might use the software.
- You will use your Rent Manager demo database to:
 - Learn the software
 - Test your integration
 - Support your customers

Please familiarize yourself with both versions of Rent Manager. Follow the instructions in the next column to install and log into **Rent Manager Express** and **Rent Manager 12**.

RENT MANAGER EXPRESS

1. You should have received an email from **Ar@RentManager.com** containing your company code, and details on scheduling an on-boarding call. Please locate this information and note your company code.
2. You should have received a second email from **Sales@RentManager.com** with your Rent Manager credentials—the username will be **Admin** with a strong unique password. You are able to use the forgot password function.
3. Go to companycode.rmx.rentmanager.com ([companycode](#) is a placeholder for your actual company code) and can be found in the email referenced in Step 1.
4. Enter in your Rent Manager credentials at the login screen.

Please note that server seat credentials are not needed for Rent Manager Express.

RENT MANAGER 12

1. Open the Remote Desktop Connection application to enter credentials.
2. Computer name is:
companycode.rmo.rentmanager.com and username is [companycode-username](#) (Example: [companycode-admin](#))
3. Go to **RentManager.com/Install** and select your operating system. Follow the instructions pertaining to the operating system you selected.
4. When you're ready to log in, you'll be prompted to enter your server seat credentials and **Rent Manager credentials**—Rent Manager will ask you to update your password for both.

TECHNICAL RESOURCES

API & API PORTAL ACCESS

API OVERVIEW:

The **Rent Manager API** offers a powerful and convenient REST-based web services solution for interacting with Rent Manager. The API provides both “read” and “write” access to the database.

The Rent Manager API has the following characteristics:

- Web-based REST API
- JSON data format
- GET and POST
- Webhooks

AUTHENTICATION METHODS

Using your Partner Token for API Calls

As a static token, the **Partner Token** allows you to make API calls to the integrated database without needing a username or password. You will need to pass the **Partner Token** in the header of each request, and the request must be made from the **whitelisted IP address** that you have designated in **Partner Web Access (PWA)**.

X-RM12API-PartnerToken

The following screenshot is taken from **Postman**, a third-party API platform for developers to structure and test API calls. We encourage the use of our **API Portal** or a similar tool, such as Postman, for learning and becoming familiar with the Rent Manager API.

ACCESS API PORTAL

1. Go to [companycode.api.rentmanager.com](#) ([companycode](#) is a placeholder for your actual company code).
2. Log into the **API Portal** with the same credentials you use for the Rent Manager Sandbox..

ADD PRIVILEGE FOR API ACCESS

1. Go to [companycode.rmx.rentmanager.com](#) ([companycode](#) is a placeholder for your actual company code). Use your Rent Manager credentials to login.
2. In the **Command Launch** at the top, type **Users**
3. Select the **User** you want to edit
4. Find the **"Options"** tile on the right
5. Check the box labeled **API Access** and **Save**

TECHNICAL RESOURCES

API & DATABASE STRUCTURE

LOCATIONS

- Locations in Rent Manager are separate databases for organizing and updating business data. Customers can have multiple Locations, with each containing its own records. It is important to understand the Location(s) the customer has created.
- During initial setup, the following API request will return the Location ID(s) the customer has given your integration access to:
companycode.api.rentmanager.com/Current/Locations
- You may specify a Location ID in your request header to retrieve data from that Location. **We encourage using a Location ID in the request header** to verify where data is being retrieved and updated.

INFORMATION ON LOCATIONS

If you have any questions on how to make an API request, please contact APISupport@RentManager.com.

LEARNING RENT MANAGER

There are many ways to learn about Rent Manager. Depending on your learning preference or how informed you'd like to be, you can take advantage of the following resources.

RENT MANAGER UNIVERSITY (RMU)

RMU is an online training platform designed to help you and your team learn how to make the most of Rent Manager. Each RMU course includes training videos, eLearning activities, simulations, and assessments.

[SIGN UP FOR YOUR RMU ACCOUNT >](#)

RENT MANAGER HELP FILE

This valuable resource provides in-depth Rent Manager documentation and useful information about every aspect of the software. When applicable, **the Help File offers step-by-step instruction** on how to use a specific feature and shares user privileges required for the feature.

You can access the Help File by **clicking the question mark icon** in the upper-right corner of Rent Manager Express; or by pressing the **F1 key** from the Rent Manager 12 database.

INTEGRATIONS BOOTCAMP

This is a live educational webinar series to help you optimize your partnership.

RENT MANAGER FEATURES & CUSTOMIZATION

CUSTOM LAYOUTS, TABS, & UDFS

USER DEFINED FIELDS

User defined fields (UDFs) are custom fields used to track information that Rent Manager doesn't track by default. Each Rent Manager entity (e.g., tenant, prospect, property, unit, etc.) can have a unique set of UDFs. While each account within an entity shares the same set of UDFs, the values are specific to the selected account.

UDFs are useful for our integrations because it allows you to capture necessary data that isn't included by default, as well as set triggers.

For Example: To track if tenants should be sent to collections, you can create a dropdown list with Yes and No values. So, if a tenant's collections field equals 'Yes,' you can collect any relevant data and proceed with the collections process.

Rent Manager offers the following **User Defined Fields**:

- Text
- Encrypted Text
- Dropdown List
- Selection List
- Yes/ No
- Date
- Numeric
- File
- Image
- Hyperlink

[LEARN MORE >](#)

CUSTOM LAYOUTS

Custom layouts allow you to customize how the details page displays in select areas of **Rent Manager Express**. Tiles can be added, deleted, or repositioned on system layouts to create an experience tailored to best suits the workflow of certain users. You can even create blank tiles to completely customize the content that displays. **System layouts** can also be set as the default for all users or assigned to specific user roles and property types.

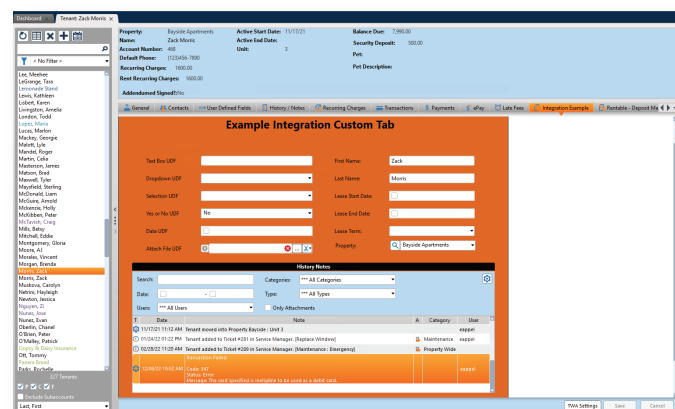

[LEARN MORE >](#)

CUSTOM TABS

Custom Tabs are a great way to organize your UDFs into one easy-to-use Tab within **Rent Manager 12**. It also adds extra branding to your product.

You can upload your custom tab into **Rent Manager's Online Template Library**. From there, your customers can download and install your custom tab within the software.

RENT MANAGER FEATURES & CUSTOMIZATION HIGHLIGHTS

After working with Rent Manager users, you will notice that some may use specific features or customizations differently than others. Additionally, customization varies between **Rent Manager Express** and **Rent Manager 12**. Below are a few examples for your team to be aware of.

ENTITY NAMES

By default, Rent Manager uses naming conventions for all **entities**; however, customers can rename them to satisfy their business needs. For example, Rent Manager uses the term “tenants,” but customers can change the name to “residents” if desired.

REPORTS/ CUSTOM REPORTS

Rent Manager offers a plethora of built-in reports, but we also have a **Report Writer** feature that allows users to create their own custom reports. Report Writer also allows you to utilize both insertable fields specific to the type of report, as well as scripting for more customizable options.

DASHBOARD/WORKPLACE

The **Dashboard** displays tiles of information related to your Rent Manager database, which can be customized by job role or user through the Dashboard Designer. Additionally, **My Workspace** is the first thing a user sees in **Rent Manager Express**, and is customized per user.

MENU RIBBON

The **menu ribbon** allows customers to navigate and use the features of **Rent Manager 12**. It can be customized by adding or removing menu tabs.

SCOREBOARDS

Most windows in **Rent Manager 12** have a **Scoreboard**. Scoreboards display various fields related to the window they are on and are completely customizable.

ACTIVATING AND MANAGING YOUR INTEGRATION

PARTNER WEB ACCESS

- When you're ready make your integration visible in the Rent Manager marketplace, you'll need to set up your **Partner Web Access (PWA) portal**. PWA is an online portal that will be used to establish your product within the software.
- **The Available Integrations Marketplace** in Rent Manager is a tool **for customers to discover your integration**. This module is one of the most critical components of the setup process because it is the only way for customers to activate your integration.

WHAT YOU NEED TO GET STARTED

Technical and marketing components are required to complete your setup.

Here are a few key items that are needed:

1. TECHNICAL ITEMS:

- White-listed IP addresses
- User privileges

2. MARKETING ITEMS:

- Product description and logo
- Sales and Support phone numbers and email address

ACCESS PARTNER WEB ACCESS

1. Go to PWA.RentManager.com
2. The first time logging in, you'll need to click the **Forgot Password?** link to create a password.
3. Your username is the email address of your company's primary contact
4. Once logged in, your primary contact can add additional users.
